COMMERCIAL & INDUSTRIAL LIGHTING REBATE PROGRAM

Retrofit and New Construction

Energy efficient lighting can help CVE members save money on their energy bills, at the same time it can help the co-op lower demand. Therefore, commercial and industrial members who upgrade (retrofit) their lighting fixtures and bulbs to more energy efficient ones, in existing facilities/buildings, and those members building new facilities/buildings (new construction) could be eligible for per-unit rebates.

Retrofit Rebates

The rebate on lighting projects is determined by comparing the actual lighting kilowatt (KW) usage with the proposed KW lighting usage to be installed for existing buildings. Rebates will be paid at \$450 per KW reduced. Efficient lighting options include but are not limited to; T8 Fluorescent, T5 Fluorescent, Compact Fluorescent Lighting (CFL), Light Emitting Diode (LED), and Plasma Lighting.

New Construction Rebates

Members installing Light Emitting Diode (LED), Compact Fluorescent Lighting (CFL) or Plasma Lighting will receive a rebate of 40 percent of the equipment cost (labor costs not included).

Both retrofit and new construction rebates cannot exceed 60 percent of the lighting equipment cost (labor not included). Rebates will be capped at \$50,000 for any one member. Rebates will be issued within 30 days of approved application.

Program Rules & Guidelines

- All lighting must be installed in accordance with all applicable local, state, and national codes and ordinances.
- All lighting equipment must be installed and operational before a rebate application is submitted.
- Removed lighting systems must be disposed of in an environmentally friendly way that meets or exceeds current Environmental Protection Agency (EPA) standards.
- All lighting equipment must be brand new.
- When installation is complete, members must notify CVE. CVE will then conduct a post-

installation inspection and verify the actual rebate amount.

- Member must apply for rebates within 90 days of installing lighting equipment. Rebates will be issued within 30 days of the approved application.
- Rebates will be given in the form of a check or utility bill credit.
- CVE does not guarantee a specific level of energy or cost savings from implementing or using products funded under this program.
- CVE is not liable for any damages caused by the operation or malfunction of the installed equipment.
- Rebates will be capped at \$75,000.00 annually for any one member. This amount applies to the combined total of all other CVE rebate programs.
- To receive the rebate, CVE members must be current (within 60 days) in the payment of their account(s).

Program Funding

Funding for this program comes from CVE's Renewable Energy and Energy Conservation Fund. Should this fund become deficient, the Commercial and Industrial Lighting Rebate Program will become inactive until such time funds are available.
